

Performance. In your hands.

# Tekomar XPERT marine Engine Module

The Engine module is a part of Accelleron's Tekomar XPERT marine all-in-one digital solution for the marine industry.

It is Accelleron's solution for engine performance optimization. It includes instant engine performance diagnostics and advisory on fuel efficiency and performance reliability. The easy-to-use interface also provides clear optimization potential quantification.

Get a complete picture of engine performance across your fleet.

# In a nutshell:

Based on experience from more than 6000 engines, the analytical software gives direct and detailed information about achievable improvements that help you in the following ways.

### Save fuel and reduce emissions:

Instant advisory on how to tune your engine to reduce fuel consumption and CO<sub>2</sub> emissions.

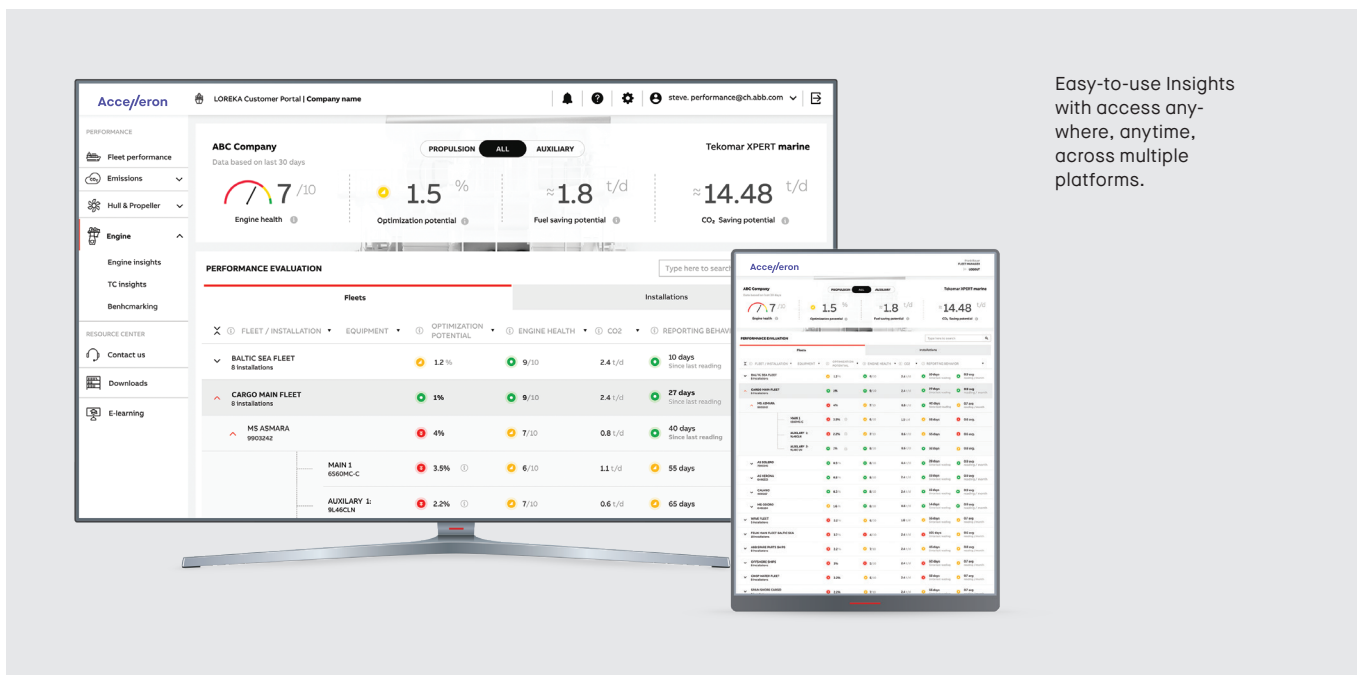

### Prevent engine issues:

Helps you monitor engine performance and condition as well as identify potential issues early on.

### Transparency:

Provides an overview of engine health and potential savings on vessel, fleet and company level.

Easy-to-use Insights with access anywhere, anytime, across multiple platforms.

## Highlights of Engine Module:

- Benchmarking of engine health and potential savings on fleet and vessel level.
- Helicopter view of engine performance across entire fleet, regardless of engine make, type and age.
- Compares actual operational data with testbed data and performs ISO corrections to allow evaluation.
- Allows KPI filtering showing actual savings and potential savings.
- Improved engine operation reduces costs and environmental footprint.
